PLANTING NEW GRASS

The lawns of Sharon Memorial Park are our most valued assets and we know how important it is for there to be grass on the grave of a loved one. While we have a significant turf management and lawn care program, there are certain times of the year where the New England climate makes it virtually impossible to successfully plant grass. During the winter months, from November through March, and the high heat of the summer from June through August, new grass seed just doesn't establish a solid grow-in. Our priority is helping families and we want to be sure that we accurately communicate this with you so that there are no unrealistic expectations. Please be assured that we will always attend to every work order request and every new interment but during these times of year promising new grass is not a realistic outcome. If you have additional questions, please contact our offices through e-mail at info@sharonmemorial.com or call at (781) 828-7216.

Thank you for your support and we appreciate your patience and understanding.

Sincerely,

Sharon Memorial Park
